

## **Leverett Board of Health offering resource phone line**

A Board of Health recruited taskforce has put together a resource line to support residents during the state-wide Covid 19 “stay at home” order. The number is 413-345-5072.

Open from 10am-2pm starting on Monday, April 6th, the line is staffed by knowledgeable volunteers who can assist you with information about the resources and services available in the area, for example grocery and medicine deliveries and curbside pickup. Some of our neighbors have volunteered to do these pickups, if you're not able to. They have also volunteered to make “check in” calls to anyone who would like that. Messages can be left if calls come in outside the 10-2 timeframe. Calls will be returned the next day.

This is not an emergency service. You should call 911 if you have a medical emergency.

We are all in this together and hope this resources line is helpful during this very challenging time. We know that needs and resources may change as we move through this pandemic but we're here to help as best as we can.
